

**Soil Evaluation**

This list has been designed for you, landowners to find professionals who specialize in septic systems. In this list you will find company's who have decided to opt into the Marathon County professional lists. Each entry will have the company name, address, telephone number and the individual who holds the proper license along with their credential number.

The first step in obtaining a sanitary permit is to have a soil evaluation completed on your property. The certified soil tester will evaluate the soils at your property to determine the type, size and location of the proposed POWTS.

Soil evaluation reports must be reviewed and approved by the Conservation, Planning and Zoning Department (CPZ). Where county verification is required, test pits must remain open until this has been completed
